STATE OF RHODE ISLAND

IN GENERAL ASSEMBLY

JANUARY SESSION, A.D. 2023

A N ACT

RELATING TO WATERS AND NAVIGATION -- COASTAL RESOURCES MANAGEMENT COUNCIL

Introduced By: Senators McKenney, Sosnowski, Euer, Pearson, Miller, DiMario, Gallo, DiPalma, Gu, and Kallman
Date Introduced: February 16, 2023
Referred To: Senate Judiciary

It is enacted by the General Assembly as follows:

SECTION 1. Legislative findings.

(1) The general assembly finds that the lack of a workable, readily identifiable right of access to the shore by the public has led to confusion, conflict and disputes between those attempting to exercise their rights and privileges to the shoreline and the rights of landowners whose property abuts the shore.

(2) The general assembly recognizes and declares the public’s rights and privileges of the shore of this, the ocean state, are not only guaranteed in the State Constitution but have enjoyed a long use throughout history to our founding documents, including the 1663 Rhode Island Charter from King Charles II. The general assembly further acknowledges the use and enjoyment of the shore by Native Americans for thousands of years prior to that.

From the Rhode Island Charter (1663-1843)

"Our express will and pleasure is, and we do, by these presents, for us, our heirs and successors, ordain and appoint that these presents, shall not in any manner, hinder any of our loving subjects, whatsoever, from using and exercising the trade of fishing upon the coast of New England, in America, but that they, and every or any of them, shall have full and free power and liberty to continue and use the trade of fishing upon the said coast, in any of the seas thereunto adjoining, or any arms of the seas, or salt water, rivers and creeks, where they have been accustomed to fish, and to build and set upon the waste land belonging to the said Colony and Plantations, such wharves,
stages and workhouses as shall be necessary for the salting, drying and keeping of their fish, to be
taken or gotten upon that coast."

(3) Rhode Island’s historical commitment to the public rights and privileges of the shore is
so strong that it was written into our Constitution in 1843 making us unique to other states:

From the Rhode Island Constitution (1843)

"The people shall continue to enjoy and freely exercise all the rights of fishery, and the
privileges of the shore, to which they have been heretofore entitled under the charter and usages of
this state. But no new right is intended to be granted, nor any existing right impaired, by this
declaration".

(4) The general assembly also recognizes that its public trust duty to preserve the public’s
rights and privileges of the shore is a progressive and evolving doctrine that is expected to adjust
to changing circumstances. In this spirit, voters of Rhode Island overwhelmingly supported the
reinforcement of these rights and privileges in 1986 following the constitutional convention of that
same year.

Added to the constitution in 1986

"Section 16. Compensation for taking of private property for public use -- Regulation of
fishery rights and shore privileges not public taking.

Private property shall not be taken for public uses, without just compensation. The powers
of the state and of its municipalities to regulate and control the use of land and waters in the
furtherance of the preservation, regeneration, and restoration of the natural environment, and in
furtherance of the protection of the rights of the people to enjoy and freely exercise the rights of
fishery and the privileges of the shore, as those rights and duties are set forth in Article I, Section
17, shall be an exercise of the police powers of the state, shall be liberally construed, and shall not
be deemed to be a public use of private property.

"Section 17. The people shall continue to enjoy and freely exercise all the rights of fishery,
and the privileges of the shore, to which they have been heretofore entitled under the charter and
usages of this state, including but not limited to fishing from the shore, the gathering of seaweed,
leaving the shore to swim in the sea and passage along the shore; and they shall be secure in their
rights to use and enjoyment of the natural resources of the state with due regard for the preservation
of their values; and it is the duty of the general assembly to provide for the conservation of the air,
land, water, plant, animal, mineral and other natural resources of the state, and to adopt all means
necessary and proper by law to protect the natural environment of the people of the state by
providing adequate resource planning for the control and regulation of the use of the natural
resources of the state and for the preservation, regeneration, and restoration of the natural
environment of the state."

(5) In 1982, our state supreme court, acknowledging that it was acting in the absence of
guidance from the general assembly, defined the public’s rights to the shore by the mean high water
(MHW) line, derived from an arithmetic average of high-water heights measured over an 18.6-year
metonic cycle. The 1986 Constitutional Convention considered and rejected defining the mean high
tide line for purposes of public access by this means and, accordingly, amended the constitution.
Moreover, since 1982, there has also been a greater awareness by the public, judiciary and
lawmakers of the scientific findings that establish the difficulties in using the MHW line as the
indicator of public rights to the shore.

The general assembly accepts the conclusions of the coastal scientists from the University
of Rhode Island who have documented that:

(i) The MHW line is not a visible feature that can be seen on the beach like a watermark or
debris line. MHW is an elevation, calculated from the average of all the high tides, two (2) per day
in Rhode Island, over a nineteen (19) year period and the MHW line is where this elevation
intersects the beach profile. It cannot be determined by the naked eye and requires special surveying
expertise and equipment, thereby making it impossible for the general public to know where the
line is.

(ii) The MHW line may change on a daily basis. Because the profile or shape of the beach
changes constantly, as waves move sand onshore, offshore and alongshore, the location where
MHW intersects the beach likewise changes. Even when the MHW line is found through precise
surveying, it does not remain in the same location for very long on a wave-dominated shoreline.
For instance, two (2) years of near weekly surveyed beach transects in the town of Charlestown
revealed that the position of the MHW line migrated back and forth across a one hundred twenty-
five foot (125') swath of the beach profile.

(iii) The MHW line is based on measurements collected inside a tide gauge, an instrument
that filters out dynamic factors like breaking waves, which causes water to run up the beach. In
other words, the measure of MHW is insulated from the dynamic action of the surf, which projects
the water to a higher elevation. This results in a pervasive and predominant situation in which the
actual water line is significantly landward of the MHW line. Data has shown that, on most days,
due to the dynamic action of the surf and other factors, dry sand is exposed below the MHW line
for, at most, only a few hours over a tidal cycle. This exposure occurs only at or near the time of
low tide.

In sum, retaining the MHW line rule employed by the court in 1982 results in the public
only having meaningful shoreline access at or near the time of low tide, if at all, at some locations.
Thus, the constitutional right and privileges of the shore delineated in the 1986 Constitutional Convention amendments have become illusory under such a rule.

SECTION 2. Chapter 46-23 of the General Laws entitled "Coastal Resources Management Council" is hereby amended by adding thereto the following section:

46-23-26. The public's rights and privileges of the shore.

(a) The public's rights and privileges of the shore are established by Article I, Sections 16 and 17 of the Rhode Island Constitution.

(b) The public's rights and privileges of the shore may be exercised, where shore exists, on wet sand or dry sand or rocky beach, up to the natural vegetation line; provided, however, that the public's rights and privileges of the shore shall not be afforded where no passable shore exists, nor on land above the natural vegetation line, rocky cliffs, or sea walls and other legally constructed shoreline infrastructure. No entitlement is hereby created for the public to use privately owned amenities, including, but not limited to: cabanas, decks and beach chairs.

(c) Any landowner whose property abuts the shore shall, with respect to the public's exercise of rights and privileges of the shore as defined in this chapter, be afforded the liability limitations pursuant to chapter 6 of title 32.

(d) The coastal resources management council (CRMC) in collaboration with the department of environmental management, shall develop and disseminate information to educate the public and property owners about the rights set out in this section.

(e) The CRMC in collaboration with the department of environmental management, and the attorney general, shall determine appropriate language and signage details for use at shoreline locations.

SECTION 3. This act shall take effect upon passage.
EXPLANATION
BY THE LEGISLATIVE COUNCIL
OF
A N A C T
RELATING TO WATERS AND NAVIGATION -- COASTAL RESOURCES MANAGEMENT COUNCIL

***

This act would provide that the public's rights and privileges of the shore established by Article I, Sections 16 and 17 of the State Constitution may be exercised where shore exists, on wet or dry sand or rocky beach up to the natural vegetation line but not where no passable shore exists with abutting landowners afforded limited liability.

This act would take effect upon passage.
