AN ACT
RELATING TO MOTOR AND OTHER VEHICLES -- PARKING FACILITIES AND PRIVILEGES

Introduced By: Senators Lombardo, Ruggerio, Pearson, DiPalma, Zurier, Acosta, Gu, Britto, F. Lombardi, and DiMario
Date Introduced: May 15, 2023
Referred To: Senate Finance

It is enacted by the General Assembly as follows:

SECTION 1. Chapter 31-28 of the General Laws entitled "Parking Facilities and Privileges" is hereby amended by adding thereto the following sections:

31-28-11. Installation of electric vehicle charging stations -- Definitions.

As used in this section and § 31-28-12, the following words shall have the following meaning:

1. "Commercial" includes, but is not limited to, any parking lot servicing box stores, grocery markets, strip malls, shopping malls, shopping centers, and hotels or motels.
2. "Electric vehicle charging station" (EVCS) means a public parking space that is served by either "EV capable" or "EV ready" charging equipment.
3. "EV capable" means designated parking spaces that have electrical panel capacity and space to support a minimum 40-ampere, 208/240-volt dedicated branch circuit for each EV parking space, and the installation of raceways (enclosed conduit that forms a physical pathway for electrical wiring), both underground and surface mounted, to support electric vehicle supply equipment (EVSE).
4. "EV ready" means a designated parking space with one 40-ampere, 208/240-volt dedicated branch circuit for EVSE servicing electric vehicles. The circuit shall terminate in a suitable termination point such as a receptacle, junction box, or an EVSE and be located in close proximity to the proposed location of the EV parking spaces.
"EVSE-installed" means EV supply equipment (EVSE) that is fully installed from the electrical panel to the parking space.

"Housing" means any new, existing, or rehabilitated private housing developments with more than twenty (20) units, that provide residential or public parking.

"Large employer" means any employer, with over one hundred (100) employees located in a single complex, that owns and operates a parking lot for employee use.

"Municipal" means any parking lot servicing a municipal building, including, but not limited to, schools, public safety facilities, town or city hall, library, public administration offices, and recreational facilities.

31-28-12. Installation of electric vehicles charging stations -- Designated parking spaces.

(a) All new parking lots and existing lots that undergo an expansion of the number of parking spaces by fifty percent (50%) or more, shall create designated parking spaces for electric vehicles.

(b) Each electric vehicle parking space shall have either an EV-ready, EV-capable, or EVSE-installed public level 2, or DC fast charger, or a dual port charger to be shared by two (2) parking spaces.

(c) Projects awarded or under development prior to January 1, 2024, are exempt from the requirements of this section. Beginning January 1, 2024, the installation of electric vehicle charging stations and the designation of parking spaces shall be required when there is:

(1) Construction of a parking lot for a new building or new off-street parking facility;

(2) An additional parking lot added to an addition for an existing building; or

(3) A parking lot increased in size to add fifty percent (50%) or more parking spaces.

(d) Projects after January 1, 2024 requiring one or more EV spaces in accordance with the provisions of subsection (e) of this section shall install a minimum of one EVSE-installed parking space.

(e) Commercial, municipal, large employer, and housing parking lots shall designate electric vehicle parking spaces based on the number of parking spaces provided in accordance with the table below. Calculations for the required number of EV spaces shall be rounded up to the nearest whole number.

(f) Electric vehicle restrictions and violations shall be enforced pursuant to the provisions of §§ 31-21-18 and 31-41.1-4 relating to the fine imposed for electric vehicle charging station restrictions.

(g) The owner of any facility or business which fails to comply with the provisions of this section shall be subject to a penalty set and enforced by the local or state authorities on public or private property when the location of the parking spaces is within the purview of the state building code, chapter 27.3 of title 23.

(h) The office of energy resources shall provide recommendations to improve electric vehicle charging infrastructure in underserved communities. In the development of these recommendations, the office of energy resources may request and be furnished with information from municipalities, an electric distribution company, the Rhode Island department of transportation, community boards and nonprofits representing municipal interests. The office of energy resources shall develop these recommendations by January 31, 2024.

(i) Municipalities shall provide the office of energy resources with semiannual reports on the number of installed public charging stations, location of the charging stations, and total number of charging stations in the community. The office of energy resources shall make this information available to the public on the agency's website.

SECTION 2. This act shall take effect on July 1, 2023.
This act would require, beginning January 1, 2024, that new parking lots and existing parking lots undergoing an expansion of fifty percent (50%) or more of the parking spaces to create designated electric vehicle parking spaces. The number of required electric vehicle parking spaces is based on the total number of parking spaces.

This act would take effect on July 1, 2023.
